\$14.5M

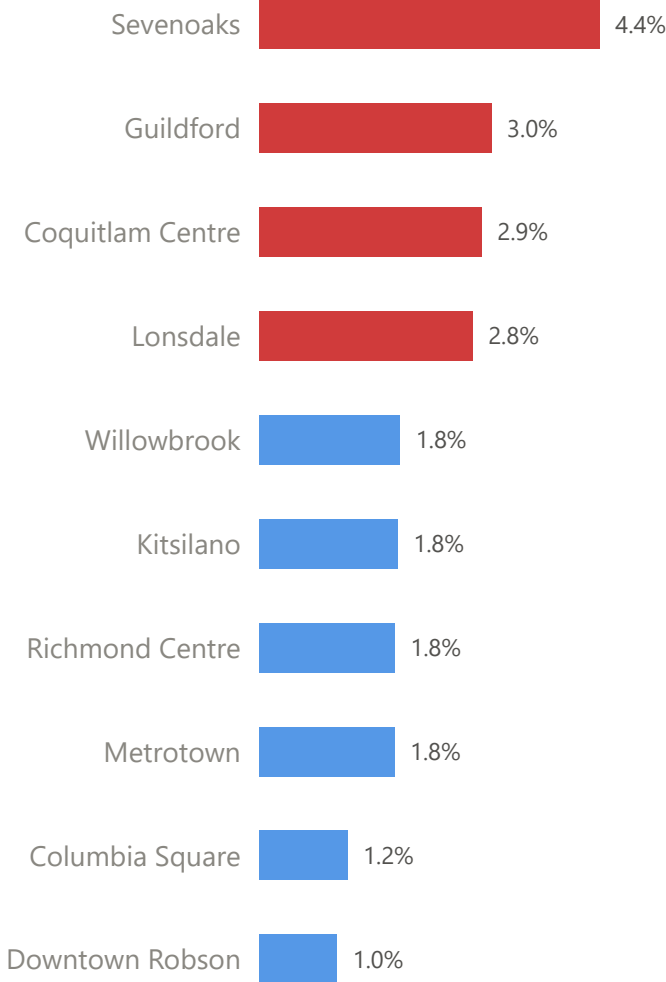

Actual Food Cost

\$683K

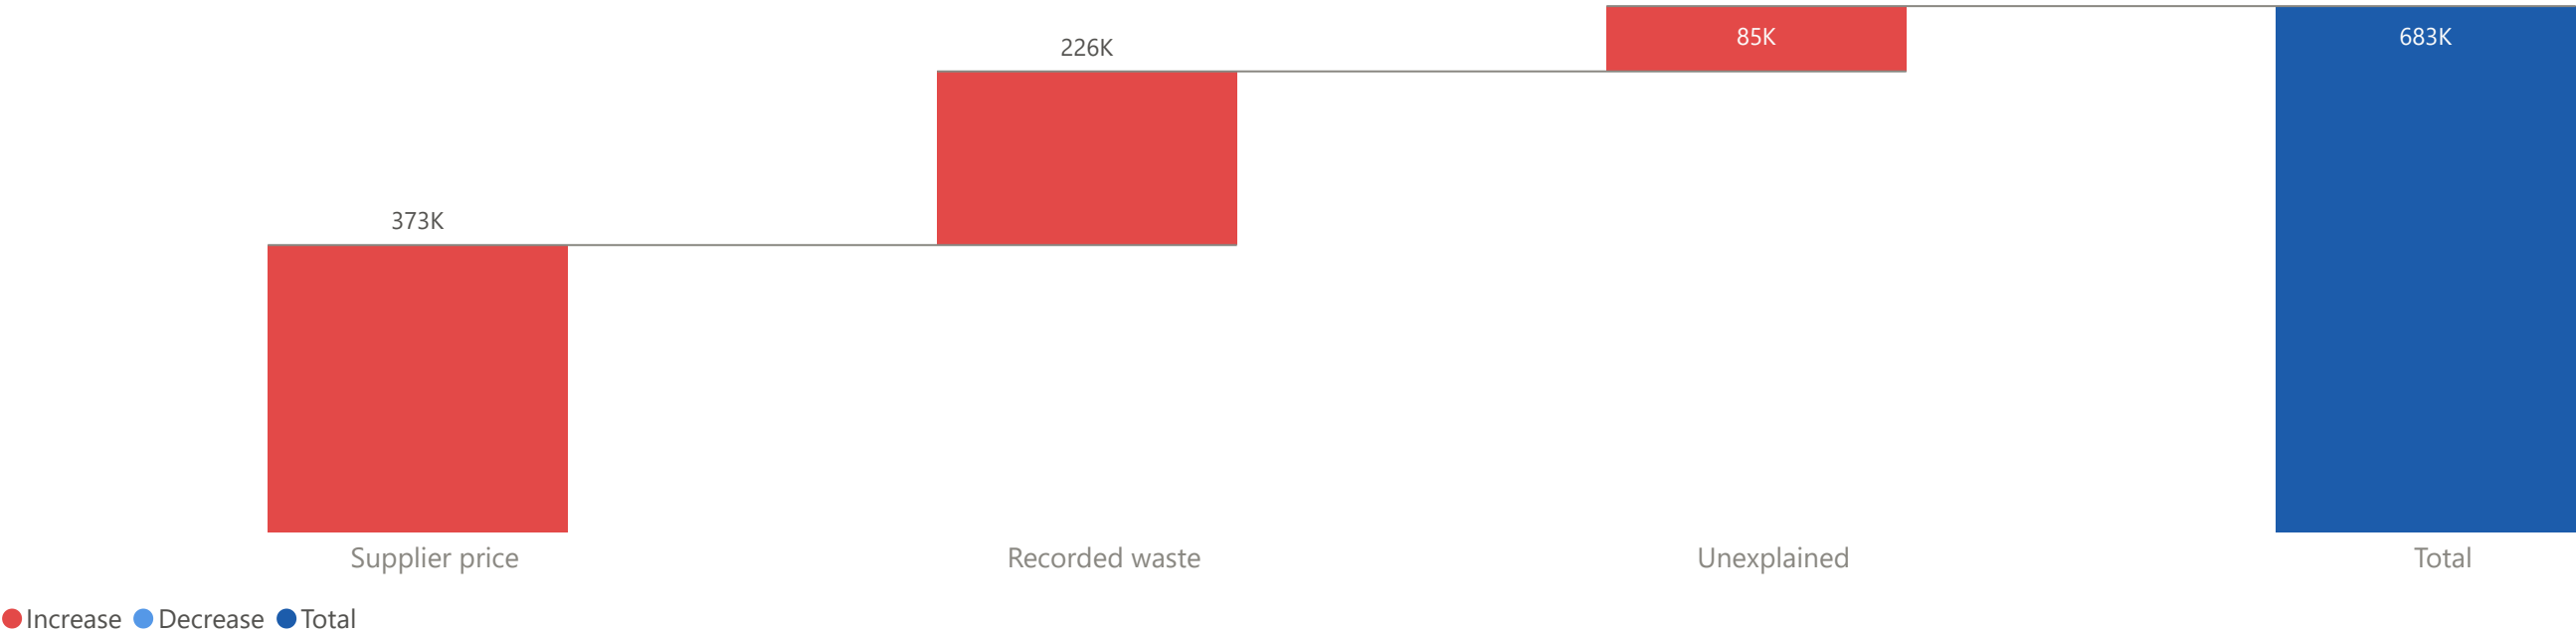

Gap

Recipe-to-actual gap is \$683K, and 55% of it is supplier pricing, not the kitchen. Biggest kitchen leak: Sevenoaks (4.4% over-use).

Where: food over-use by location (waste + unexplained)

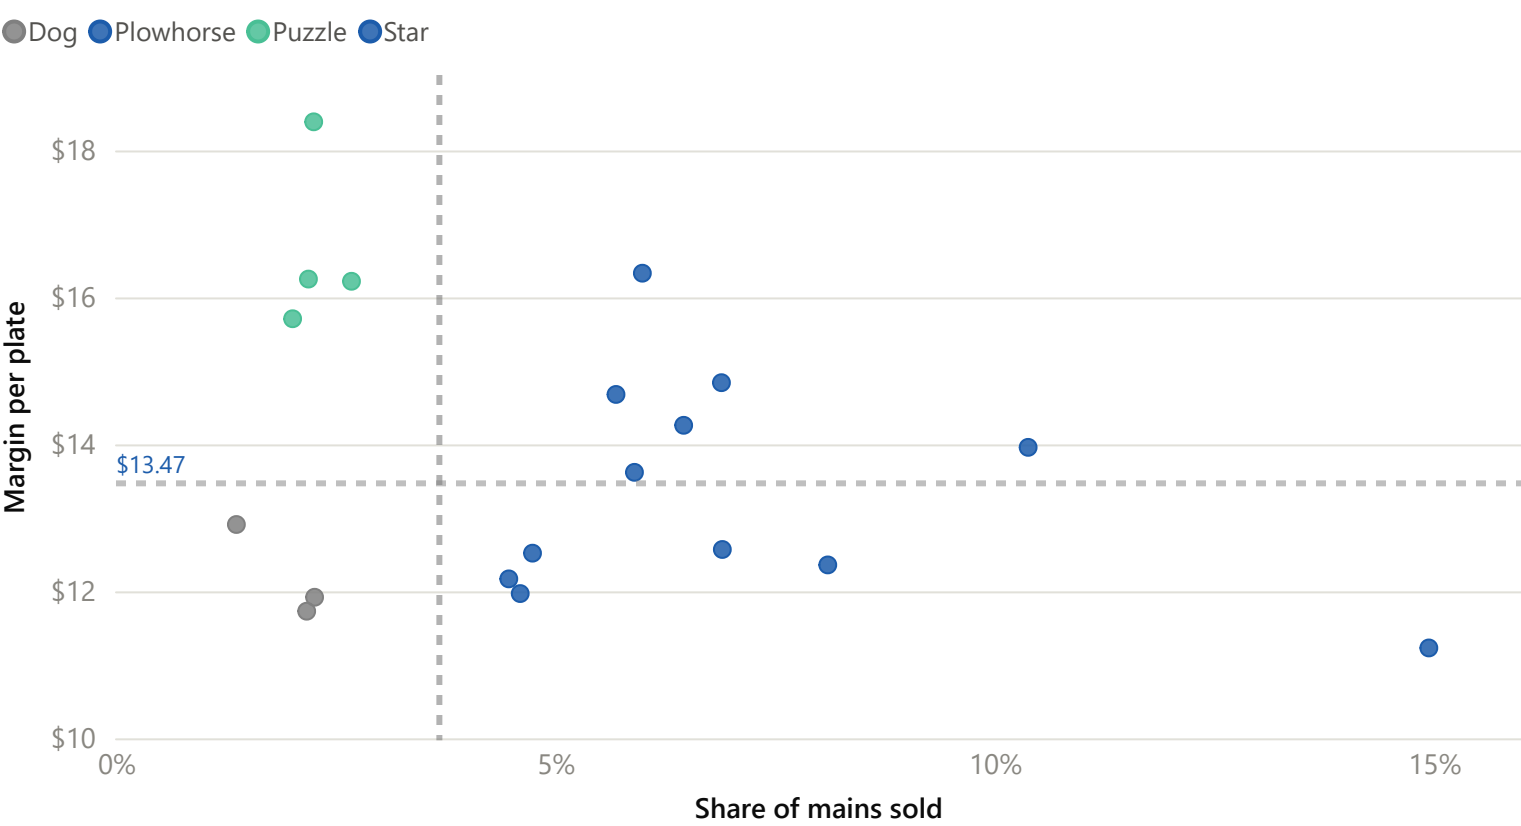

Why: the \$683K gap between recipe cost and actual food cost

Drill: unexplained variance → location → ingredient

Menu engineering · mains, 2025

3 actions · ≈ \$320K a year

Estimates annualised from 2026 YTD. Pick a location to see its note.

LABOUR · COQUITLAM CENTRE

Staff Mondays to a Tuesday template, not Friday's

≈ \$87K / yr

Mondays get Friday's hours (**10.8K**) for Tuesday's guests (**21.8K covers**). Labour runs **42%** vs about 30% on other weekdays: roughly **4,200 hours** a year above need.

Owner: GM + area manager · **Measure:** Monday labour % each week

See Labour

FOOD COST · GUILDFORD

Fix tomato portioning (it started in March)

≈ \$12K / yr

Tomatoes run **28%** over recipe since March vs 4–8% at other stores, and the waste log doesn't explain it. Likely portioning: re-train to the spec sheet, check the scales, consider pre-portioned tomato.

Owner: Kitchen manager · **Measure:** weekly tomato variance

See Food & Menu

MENU · HARBOUR CLASSIC BURGER

Test +\$0.50 on the #1 seller

≈ \$220K / yr

Our best seller (**444K plates** in 2025) but a Plowhorse: **\$11.23** margin vs **\$13.47** average. Test in 2–3 stores for 4 weeks and watch volume before rolling out.

Owner: Menu & pricing · **Measure:** plates sold and margin, test vs control stores

Recommendation

Chain labour is on target at 29.8% and food cost is just over at 28.6%, but the averages hide two specific problems. Coquitlam Centre's Mondays run 42.2% labour, the worst store-day in the chain, and Guildford has used 28.0% more tomato than the recipes call for since March. Ask both GMs to act on these this week, and take the \$683K recipe-to-actual gap to purchasing, since 55% of it is supplier price.
